

VARSHA ANUMOLU

Senior Software Engineer | Angular and Generative AI

Pune, India | 7887858338 | anumoluvarsha@gmail.com | [linkedin.com/in/varsha-anumolu](https://www.linkedin.com/in/varsha-anumolu)

PROFESSIONAL SUMMARY

Senior Software Engineer with 5 years of experience building and optimizing enterprise web and cross-platform applications. Specializes in Angular, TypeScript, JavaScript, RxJS, reusable frontend architecture, performance optimization, and low-code platform engineering. Experienced in integrating Claude LLM-powered workflows that translate natural-language requirements into structured application configurations.

TECHNICAL SKILLS

Frontend: Angular, TypeScript, JavaScript, RxJS, Angular Material, HTML5, CSS3, SCSS, Bootstrap, responsive design

Angular Architecture: Component-based architecture, reusable component libraries, reactive forms, dependency injection, routing, lazy loading, state management

Generative AI: Claude LLM integration, prompt engineering, system prompts, structured output generation, JSON schema validation, output validation, AI guardrails

Testing and Quality: Unit testing, code reviews, debugging, refactoring, SonarQube, static code analysis

API and Cloud: REST APIs, Jenkins, CI/CD, AWS RDS, Amazon S3

Data and Tools: PostgreSQL, SQL, Redis, Git, Jira, Liquibase, Agile/Scrum

Cross-Platform: Flutter, Dart, Flutter Web

PROFESSIONAL EXPERIENCE

Decimal Technologies | Gurugram, India | July 2021 - Present

Senior Software Engineer

Jan 2026 - Present

VDesigner Platform | AI-Powered Low-Code Application Development

- Led the integration of AI-powered application generation into VDesigner, enabling users to create application screens and workflows from natural-language prompts.
- Implemented Claude LLM-assisted generation workflows and schema-validation rules to produce valid VDesigner JSON configurations.
- Designed system prompts, platform rules, component metadata, and generation guidelines that translate user requirements into renderable application configurations.
- Collaborated with backend, AI, product, architecture, and QA teams on R&D, debugging, testing, and production-readiness improvements.

Software Engineer

Oct 2023 - Dec 2025

VDesigner | Angular-Based Low-Code Platform

- Engineered 20+ reusable Angular UI components, workflows, validation frameworks, and configurable features for a drag-and-drop low-code platform.
- Delivered customer-facing functionality using Angular, TypeScript, RxJS, Angular Material, HTML, SCSS, JavaScript, and REST APIs.
- Conducted code reviews and improved application stability through systematic debugging, refactoring, testing, and SonarQube-driven quality practices.
- Supported Jenkins-based CI/CD and cloud-hosted application workflows involving AWS RDS and Amazon S3.

Associate Software Engineer

Jul 2021 - Oct 2023

DataOn | Flutter-Based Application Runtime Platform

- Built reusable Flutter framework components and platform integrations, including dynamic forms, file management, camera services, QR/barcode scanning, and Firebase Authentication.
- Enhanced maintainability and code quality through debugging, refactoring, testing, and SonarQube analysis.
- Mentored and trained the IndiaOne team for two months, supporting faster technical onboarding and platform readiness.

EDUCATION

BITS Pilani, Goa Campus | Bachelor's Degree in Computer Science | 2017 - 2021

CERTIFICATION

MIT xPRO Post Graduate Certificate in Full Stack Development | December 2021
