

VARSHA ANUMOLU

Software Engineer | AI-Powered Application Development | Angular | Low-Code/No-Code Platforms

7887858338

anumoluvarsha@gmail.com

in [Linkedin](#)

To pursue a challenging Senior Software Engineer role that leverages a proven track record in frontend engineering, Angular, TypeScript, and AI-powered application development. Eager to apply strong technical acumen, innovative problem-solving capabilities, and expertise in frontend architecture, reusable frameworks, and AI integration to engineer scalable, high-performance, and intelligent software solutions.

Education

BITS Pilani, Goa Campus
Bachelor's Degree in Computer Science | 2017 – 2021

Core Competencies

Software Product Development

Frontend Solution Engineering

Application Architecture

AI Solution Integration

Digital Application Transformation

Low-Code Platform Engineering

Application Performance Optimization

Product Feature Development

Software Development Lifecycle (SDLC)

Technical Skills

- ⌚ **Frontend Development:** Angular, Typescript, JavaScript, RxJS, HTML5, CSS3, SCSS
- ⌚ **Mobile & Cross-Platform Development:** Flutter, Dart
- ⌚ **AI & Application Engineering:** LLM Integration, Prompt Engineering, AI-Powered Application Development, Low-Code/No-Code Platforms
- ⌚ **DevOps & Cloud:** Jenkins, AWS RDS, CI/CD
- ⌚ **Database & Caching:** PostgreSQL, SQL, Redis
- ⌚ **Development & Collaboration Tools:** Git, Jira, Liquibase
- ⌚ **Code Quality & Engineering:** SonarQube, Code Refactoring, Performance Optimization, Reusable Component Development

Certifications

MIT xPRO – Post Graduate Certificate in Full Stack Development | Dec 2021

Microsoft Certified: Data Analyst Associate | Jun 2021 – May 2023

Personal Details

Address : Pune, India

Date of Birth : 1st May'2000

Profile Summary

- ⌚ Accomplished Senior Software Engineer with over 5 years of experience in driving end-to-end software product development, frontend engineering, and scalable application solutions within IT services and software development environments.
- ⌚ Proven expertise in architecting and optimizing enterprise-grade web applications, leveraging strong capabilities in frontend architecture, reusable framework development, UI engineering, and performance optimization.
- ⌚ Spearheaded AI-driven transformation initiatives within a low-code/no-code application platform, enabling users to generate application screens and workflows through natural language prompts.
- ⌚ Demonstrated proficiency in AI solution integration, prompt engineering, and LLM-enabled application development, with hands-on involvement in integrating Claude LLM for schema-compliant application generation.
- ⌚ Strong track record of translating complex business requirements into scalable, configurable, and user-centric application solutions while collaborating cross-functionally with backend, AI, product, architecture, and QA teams.

Work Experience

Decimal Technologies | Jul 2021 - Present

Growth Path

Senior Software Engineer | Jan 2026 – Present

VDesigner Platform | AI-Powered Low-Code Application Development Platform

- ⌚ Spearheading the integration of AI-powered application generation capabilities, enabling users to create application screens and workflows through natural language prompts.
- ⌚ Driving AI-assisted development workflows by integrating Claude LLM and ensuring schema-compliant outputs for seamless application generation.
- ⌚ Engineering prompt and system-level frameworks by defining platform rules, component metadata, and generation guidelines for valid VDesigner JSON configurations.
- ⌚ Developing mechanisms to translate user requirements into structured VDesigner configurations, enabling direct rendering and streamlined application creation.
- ⌚ Collaborating with backend and AI teams, conducting R&D, testing, debugging, and code optimization to enhance platform stability and AI-driven capabilities.

Software Engineer | Oct 2023 – Dec 2025

VDesigner | Angular-Based Low-Code Platform

- ⌚ Developed and enhanced core capabilities of VDesigner, a drag-and-drop low-code platform for building configurable web and mobile applications.
- ⌚ Engineered reusable UI components, workflows, and validation frameworks using Angular, TypeScript, HTML, CSS, and JavaScript to accelerate platform development.
- ⌚ Delivered customer-facing platform features in collaboration with product managers, architects, and QA teams across the software development lifecycle.
- ⌚ Strengthened application stability, performance, and code quality through systematic debugging, refactoring, testing, and optimization initiatives.
- ⌚ Contributed to knowledge sharing by training team members on Angular development practices and low-code platform capabilities.

Associate Software Engineer | Jul 2021 – Oct 2023

DataOn | Flutter-Based Application Runtime Platform

- ⌚ Developed reusable framework components and platform integrations, including dynamic forms, file management, camera services, QR/barcode scanning, and Firebase Authentication.
- ⌚ Enhanced platform performance, maintainability, and code quality through debugging, refactoring, testing, and SonarQube-driven quality initiatives.
- ⌚ Translated functional requirements into scalable technical solutions while collaborating with cross-functional teams on feature development and enhancements.
- ⌚ Conducted code reviews and testing to ensure adherence to engineering standards, platform reliability, and quality benchmarks.
- ⌚ Mentored and trained the IndiaOne team for two months, supporting faster technical onboarding and development readiness.
